DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 1-8 and 23-34, drawn to use of a metal complex as n-dopant for producing an electronic component, wherein said complex has a central atom with a valence electron number of at least 16, or said complex is multinuclear.

Group 2, claim(s) 1-4, 9, 10, 21, and 22, drawn to use of a metal complex as n-dopant for producing an electronic component, wherein said complex contains a borate ligand.

Group 3, claim(s) 1-4, 11, 12, and 20, drawn to use of a metal complex as a n-dopant for producing an electronic component, wherein the complex comprises at least one carbanion atom as a donor atom.

Group 4, claim(s) 1-4 and 13-19, drawn to use of a metal complex as n-dopant for producing an electronic component, wherein the complex comprises defined 5- or 6-membered heterocycles as ligands.

Group 5, claim(s) 35-43, drawn to multinuclear complexes used as dopants, their depiction and their ligands.

2. The inventions listed as Groups 1-5 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Independent claims 1 and 35 have as their only common identifiable technical feature a metal complex that is used as a dopant. This is known from WO 03/088271 (see various examples, as in paragraph 65, for example).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
